OBJECTIVE

Seeking a software development internship to apply and deepen my knowledge of programming, data structures, and web development, contributing efficient solutions and learning from experienced teams.

PROFESSIONAL EXPERIENCE

Software Development Intern

TechNova Soluções (fictitious company) | 2024 - Present

- Development of back-end features in Python (Django) for an internal order management system.
- Creation of automated tests, increasing test coverage of the billing module by 30%.
- Participation in daily Scrum meetings and pull request code reviews.

Data Structures Teaching Assistant

Universidade Federal de Exemplo (UFE) | 2023 - 2024

- Supported undergraduate students with lists, stacks, queues, trees, and graphs.
- Graded exercise sets and prepared supporting study material.
- Held weekly office hours to answer student questions.

Volunteer Developer

Projeto Código Social (fictitious NGO) | 2023 - 2023

- Developed a React website to advertise job openings for low-income communities.
- Integrated the site with a public job listings API.

Hackathon Participant

University Innovation Hackathon (fictitious event) | 2022

- Built a mobile app prototype connecting students for university carpooling, in a 4-person team, within 24 hours.
- Used Flutter and Firebase.

EDUCATION

Bachelor's Degree in Computer Science

Universidade Federal de Exemplo (UFE) | 2021 - 2025 (expected completion)

- Emphasis on Software Engineering and Data Structures.
- Final year project (in progress): content recommendation system using machine learning.

Technical High School Diploma in Information Technology

Escola Técnica Estadual de Exemplo | 2018 - 2020

SKILLS

- Python, Java, and JavaScript
- Web development with Django and React
- SQL databases (PostgreSQL, MySQL)
- Version control with Git and GitHub
- Data structures and algorithms
- Agile methodologies (Scrum)
- Intermediate English

LANGUAGES

- Portuguese: Native
- English: Intermediate

COVER LETTER

Dear Recruitment Team,

I am a Computer Science student passionate about solving problems through code and learning new technologies. Throughout my degree, I've tried to combine theory and practice: I worked as a teaching assistant for the Data Structures course, contributed as a volunteer developer on a social project, and took part in university hackathons, always looking for challenges that pushed me out of my comfort zone.

I have hands-on experience with back-end development using Python/Django, and I've also explored front-end development with React and mobile development with Flutter. I'm a fast learner and enjoy working in a team, contributing both code and ideas.

I'm looking for an opportunity to keep growing as a developer, applying my technical knowledge to real projects and learning from experienced professionals.
